

DHY 114: Dental Radiology

This course is designed to cover the essential knowledge of radiographic technique for the practice of dentistry. Emphasis is placed on x-ray properties, generation of x-rays, film processing, infection control, quality assurance, intraoral radiographic technique and image characteristics. Students will be taught to produce diagnostically acceptable intra and extra-oral radiographs. Upon completion, students will be able to expose, process and mount radiographs on patients for diagnostic purpose under the direct supervision of a dentist.
