

OTA 218: Level I Fieldwork – A

This course is designed to enrich the student's observation and professional interaction skills within a structured, supervised practicum. The student will be supervised by qualified personnel to include, but not limited to: currently licensed or credentialed occupational therapy practitioners, psychologists, physician assistants, teachers, social workers, nurses and physical therapists. The course is designed to enrich didactic course work through directed observation and participation in selected aspects of the occupational therapy process. Upon completion, students should be able to successfully communicate with and present observed behaviors of an assigned population, in a professional oral and/or written manner. CORE.
