

OTA 219: Level I Fieldwork – B

This course provides opportunities to perform selected procedures under direct supervision. The student's observation and professional interaction skills are strengthened under supervision by qualified personnel to include, but not limited to: currently licensed or credentialed occupational therapy practitioners, psychologists, physician assistants, teachers, social workers, nurses and physical therapists. The course is designed to enrich didactic course work through directed observation and participation in selected aspects of the occupational therapy process. Upon completion, students should be able to collect and present pertinent data in a professional manner, successfully communicate with health professionals and interact with assigned client populations. CORE.
