

OTA 222: Treatment Planning and Implementation: Part II Theory – Adult

This course is the second of a two part series. It is an in depth study of the sensorimotor, cognitive, and psychosocial factors of human development from young adult thru older adult. Emphasis is on the development process through end of life. Lecture focus will include the OTA's role in the referral, data collection, screening, and evaluation process. Students will develop knowledge required to design and implement treatment plans through an in depth analysis of tasks relative to areas of occupation, performance skills, performance patterns, activity demands, contexts, and client factors. Upon completion students will describe the factors influencing occupational roles in advancing stages of life, understand the referral process, and the OT/OTA collaboration needed to develop individualized treatment plans for young adult – older adult clients. CORE.
