

OTA 225: Occupational Activity Analysis Lab

This course is the lab component of OTA 224. It will provide students with the opportunity to develop activity analyses for a variety of occupation based activities and how occupation is used in assessment and therapeutic intervention of persons served by the occupational therapy practitioner. Students will develop skills in reasoning, analysis and problem-solving related to the appropriate selection of occupational based activities. Emphasis is placed upon selection, grading, and adapting therapeutic activities which promote and restore mental and physical health and well-being across the life span. Upon completion, students should be able to describe, analyze, and document a variety of occupation based activities used in assessment and treatment of pediatric, adolescent and adult populations with physical or psychosocial dysfunction. CORE.
