

PHY 115: Technical Physics

Technical physics is an algebra based physics course designed to utilize modular concepts to include: motion, forces, torque, work energy, heat wave/sound, and electricity. Results of physics education research and physics applications in the workplace are used to improve the student's understanding of physics in technical areas. Upon completion, students will be able to: define motion and describe specific module concepts; utilize microcomputers to generate motion diagrams; understand the nature of contact forces and distinguish passive forces; work cooperatively to set up laboratory exercises; and demonstrate applications of module-specific concepts.

Credits: 4

Transfer Code: Code C

Lab Hours: 2

Lecture Hours: 3

Prerequisites:

College Algebra - MTH 100

Program: *Physics*

Semester Offered:

Spring

Fall
