

# PSG 113: Polysomnographic Technology III

This course studies the etiology and treatment of the sleep/wake cycle and related disorders in the context of the interrelationships of various systems. Topics include overview of anatomy and physiology, respiratory function, cardiac function, neurologic function, sleep scoring and event recognition as it relates to sleep. Upon completion, the student will be able to understand the basic function of these bodily systems in their relation to the sleep/wake cycle. As needed.
