Program Description

Teachers of young children play a vital role in the development of children. Positive experiences during children's early years are critical for brain development and can shape their views of themselves and the world. What children learn and experience in the first years can affect their later success or failure in school. Early childhood teachers use a variety of teaching strategies and materials to teach basic skills and introduce concepts to children in all subjects. This General Studies curriculum with an emphasis in Early Childhood Education will help students increase their knowledge of the education of young children as they prepare for a career in early childhood education.
